Overall, the Company saw solid top-line performance across all key segments in Q1 2021. For Q1 2021, **Group Revenue** increased 5.5% year-over-year to reach RUB 123.9 bn. Growth was supported by sales of handsets and accessories amid robust smart device demand as well as by solid performance in core connectivity services in both mobile and fixed-line in Russia. In addition, areas beyond connectivity drove more than 1/3 of top-line year-over-year growth, led by Fintech — reflecting sustained loan and transaction revenue growth at MTS Bank — with solid contributions also coming from Media and Cloud & Digital Solutions.

**Group Adjusted OIBDA** in Q1 2021 accelerated to 6.7% year-over-year to reach RUB 55.4 bn on the back of positive impacts from core domestic connectivity services — which more than offset continued year-over-year roaming headwinds due to travel restrictions amid the COVID-19 pandemic — as well as MTS Bank and other factors.

**Group Net Profit** in Q1 2021 decreased 8.8% year-over-year to RUB 16.2 bn. versus Q1 2020. Net income was supported by operating profitability in both core telecom and MTS Bank, as well as lower financing costs. At the same time, these factors were more than offset by a high base effect from the year-ago quarter that saw a significant positive impact of FX and derivative operations recognized in Q1 2020, reflecting the Company's steps taken to mitigate currency risk amid a weakening ruble environment.

**Group Cash Capital Expenditures** in Q1 2021 amounted to RUB 29.3 bn, of which Russia accounted for RUB 29.1 bn. Investment was primarily allocated to network development,

For the three months ended March 31, 2021, **Group Free Cash Flow excluding MTS Bank**<sup>8</sup> decreased RUB 6.7 bn year-over-year to RUB 11.3 bn, reflecting higher capital expenditures in Q1 2021 versus the year-ago period.

At the end of Q1 2021, MTS's **Gross Debt** stood at RUB 422.4 bn (excluding debt issuance costs). The current portion of long-term debt amounted to RUB 37.3 bn as compared to RUB 57.3 bn in cash and equivalents, reflecting the Company's continued commitment to maintain a healthy liquidity cushion. As of March 31, 2021, MTS's gross debt weighted average interest stood at 6.3% — a decline of more than 100 b.p. year-over-year — and the Group's Net debt ex-LL<sup>9</sup> to Last-Twelve-Months Adjusted OIBDA ratio increased to 1.5x.

This press release includes financial information prepared in accordance with International Financial Reporting Standards, or IFRS, as well as other financial measures referred to as non-IFRS. The non-IFRS financial measures should be considered in addition to, but not as a substitute for, the information prepared in accordance with IFRS. Due to the rounding and translation practices, Russian ruble and functional currency margins, as well as other non-IFRS financial measures, may differ.

Operating Income Before Depreciation and Amortization (OIBDA) and OIBDA margin. OIBDA represents operating income before depreciation and amortization. OIBDA margin is defined as OIBDA as a percentage of our net revenues. OIBDA may not be similar to OIBDA measures of other companies, is not a measurement under IFRS and should be considered in addition to, but not as a substitute for, the information contained in our consolidated statement of profit or loss. We believe that OIBDA provides useful information to investors because it is an indicator of the strength and performance of our ongoing business operations, including our ability to fund discretionary spending such as

capital expenditures, acquisitions of mobile operators and other investments and our ability to incur and service debt. While depreciation and amortization are considered operating costs under IFRS, these expenses primarily represent the non-cash current period allocation of costs associated with long-lived assets acquired or constructed in prior periods. Our OIBDA calculation is commonly used as one of the bases for investors, analysts and credit rating agencies to evaluate and compare the periodic and future operating performance and value of companies within the wireless telecommunications industry. We use the term Adjusted for OIBDA and operating profit where there were items that do not reflect underlying operations that were excluded.

# OIBDA and Adjusted OIBDA can be reconciled to our consolidated statements of profit or loss as follows<sup>13</sup>:

#### **Definitions**

**Total debt.** Total debt represents short-term and long-term debt excluding lease obligations and debt issuance costs.

**Net debt.** Net debt represents total debt less cash and cash equivalents, short-term investments, long-term deposits, swap and currency hedging. Our net debt calculation is commonly used as one of the bases for investors, analysts and credit rating agencies to evaluate and compare our periodic and future liquidity within the wireless telecommunications industry. Our net debt calculation may not be similar to the net debt calculation of other companies. The non-IFRS financial measures should be considered in addition to, but not as a substitute for, the information prepared in accordance with IFRS.

**Free Cash Flow.** Free cash flow is represented by net cash from operating activities less cash used for certain investing activities. Free cash flow is commonly used by investors, analysts and credit rating agencies to assess and evaluate our performance over time and within the wireless telecommunications industry. Our free cash flow calculation may not be similar to the free cash flow calculation of other companies. Because free cash flow is not based in IFRS and excludes certain sources and uses of cash, the calculation should not be looked upon as an alternative to our consolidated statement of cash flows or other information prepared in accordance with IFRS.

**Subscriber.** We define a "subscriber" as an organization or individual, whose SIM-card:

- shows traffic-generating activity or
- accrues a balance for services rendered or
- is replenished or topped off

over the course of any three-month period, inclusive within the reporting period, and was not blocked at the end of the period.
